Title: **Queen Of Thieves / Stretch Of The Imagination**

Artist: **TARAMIS**

Taramis started under the name Prowler back in 1982, playing cover versions of Iron Maiden and other heroes in the clubs of Melbourne, Australia.

Later they decided to write their own songs, which ended up on the demo „Blood & Honour“ in 1984.

Consequently, they only had to drop the name reminiscent of Iron Maiden and called themselves Taramis from then on.

In 1987, the debut „Queen Of Thieves“ was released on the small „Metal For Melbourne“ label (actually a record shop).

The songs on this album have a magic all of their own, and are often associated with epic metal.

Emotionally charged acoustic parts alternate with powerful heavy metal and all this with a very virtuoso playing style. The budget for the recording was so low, however, that the LP is often described as a rough diamond.

But this is precisely what gives it its very own charm, as albums by bands like Manilla Road or Satan's Host still prove today. After all, the album was licensed by Metal Blade Records (with different cover artwork) in 1988. Roadrunner Records followed suit for Europe in the same year.

Nevertheless, „Queen Of Thieves“ remained an insider tip for connoisseurs.

After some line-up changes, Taramis emerged with a second album in 1991. This time the German company Rising Sun acquired the rights (in Australia Metal For Melbourne was again the label) and released „Stretch Of The Imagination“ on CD and LP. The change in style towards progressive metal (with thrash influences) increased the fan base, but the label could not adequately promote the Australians. Besides, other trends prevailed in 1991. Taramis disbanded, but reunited irregularly to play occasional gigs for their still large fanbase.

For the first time, both albums are now available on a double CD, freshly remastered by Neudi (Manilla Road, Trance, Griffin) and with bonus tracks (studio recordings), some of which have never been released on CD before. The booklet tells the story of the group on 20 pages and contains many rare photos and other illustrations.

Title: **Time-Lapse**

Artist: **INFRABLACK**

The idea for this album arose during the beginning of the corona pandemic. All of a sudden I had lots of free time that I could spend on my synth collection that today contains about 80 synthesizers/modules. I discovered interesting sounds and patterns and I started working on instrumental songs in line with what I used to listen to in the seventies when I was a kid. And fairly quickly I made plans to record an album with **10 songs** and I started with the titles.

“**Cubicles**” is a way to organize the bureau landscape at work where people all have their own island and therefore are working together and yet separated. Some of the titles refer to space related things (“**Interstellar Voyager**”, “**Lunar Escape**”, “**Mars2Venus**”) like they often used to do in the beginning of the synthesizer music. “**Sinusoidal Atmosphere**” and “**Saw Unseen**” contain two typical basic synth waves (sinus and saw) while “Saw Unseen” is also a play on words. “**Time-Lapse**” stands for the fact that 50 years have passed since I first started to listen to this kind of music and the recording of my own first album. And then there’s two songs that form a unity. “**Afterworld**” starts very happy and joyful but rather soon you feel a change in mood cause something terrible happens and towards the end it is about what’s left of our planet after a life destroying disaster. “**Re-Genesis**” tells the story of our planet recovering from this disaster and slowly rebuilding it into its former state. And I decided to end this album (and eventually the next ones too) with a song about a zodiac sign. For this one I chose mine, “**Pisces**”.
