Title: **Crucifixion: Complete Excess**
Artist: **EXCESS**

From the Ludwigshafen area came one of the first death thrash bands in the region and became a breeding ground for musicians who are active today in successful, albeit stylistically different sounding groups. However, you don't have to be a fan of Crematory, Mystic Circle or Blood to like Excess (later: Malignity), or even find them fascinating, but their traditional roots clearly reveal themselves.

Excess was founded in the summer of 1988 and after a short time the first line-up was formed with Harald Heine (bass, vocals), Thorsten „Smog“ Aschenbrenner (guitar) and Markus Jüllich (drums). They shared a rehearsal room reeking of rotten beer with the locally hip thrash band Sudden Darkness, whose material was also released on Golden Core via double CD a few months ago. The guitarist of this group recorded the first Excess demo „Torment Of Death“ with limited means, but at least already multitrack, which sounds amazingly good for the circumstances. Many a black metal band in the nineties would have liked to have this sound on their album. Of course, the technical skills of the three musicians were still very limited, but it is this „forced primitive“ that makes these five tracks so authentic, but also brutal. You can't plan or consciously create this aesthetic.

The most famous and certainly most popular demo opens the CD: „**Crucifixion**“ from 1992. Reinforced with singer Clausi (later active with the band Blood) and with a change on the drums, they offered a real quantum leap, but without leaving the simply kept mix of death, thrash and in places doom. The production of Guido Holzmänn (Economist, Mystic Circle, Graveworm, etc.), whose studio was still under construction in 1992, is to this day an incredible, yet transparent „Wall Of Sound“ that is unparalleled.

The renaming to Malignity was followed by the last demo before three of the four musicians joined better known acts, with whom they serve different scenes than the ones they started with as Excess/Malignity. Nevertheless, all involved agreed to this re-release and support the work on it. Thus, a gap in the history of German death thrash can now be closed.

Title: **Show No Mercy, After The Bomb**
Artist: **HAMMERS RULE**

For a long time it seemed impossible that this US metal gem would officially appear as a re-release. Even before Golden Core, labels contacted the three former band members who are still alive, but they only received rejections. „We just hit it off at some point on a whole other level than just business, and after a lot of talking we got the green light and experienced a very friendly negotiation period,“ reports Golden Core A&R Neudi, himself a fan of the long-defunct Baltimore group, but also just a musician.

Hammers Rule (the name comes from the thanks list of Iron Maiden's first LP) were simply over the top! They financed an impressive stage show with all kinds of effects and custom leather outfits before they even had a record on the market. When no major label was interested (almost normal in 1984), they had no interest in giving the material into the hands of an independent company and produced (as Tangent Records) a complete album themselves with the support of Web (Satan's Host, among others): „**Show No Mercy**“. The first edition in white vinyl sold very well, but reached only a few import stores in Europe. This is also true for the EP „After The Bomb“, which was released under similar conditions one year later. This contained two new tracks (and two from the LP). Nevertheless, there were numerous enthusiastic reactions from Germany and so they licensed a compilation of the LP and the EP under the name „**After The Bomb**“ to the German company with probably the worst reputation in the business: Metal Enterprises! Insiders like to joke here „So the label finally had something good!“, but Hammers Rule was not in the mood to laugh when without their knowledge a series of demo tracks was offered as a second album. Today the musicians still vehemently distance themselves from this illegal product (LP and CD) and also on this re-release we respect the former members' wish to let this annoying chapter rest. You can read the whole story in the liner notes.

Hammers Rule did not want to commit themselves by the degree of hardness and thus cover an enormously wide spectrum of US metal. While the first four tracks are between epic, heavy and speed metal (as well as the two EP tracks „Kamikaze“ and „Stop The World“), the B-side of the original LP was a bit more accessible and also fits well with the high hairspray consumption of the eighties. But even these tracks are full of energy and playfulness. One of the reasons is the incredible rhythm section of drummer Chuck Hohn (with only one bass drum!!) and bassist Shaun Henley. The two musicians operated quite loosely on a level like Steve Harris and Nicko McBrain (Iron Maiden). In addition, the bass impressively replaces a second guitar with its powerful playing and presence in the mix. The album and also the EP were largely recorded live in the studio. But one of the most important arguments is that metal fans worldwide have waited many years for a re-release. The LP comes with bonus 7" single that contains the two tracks from the „After The Bomb“ EP that were not already on the album.

Title: **Queen Of Thieves**
Artist: **TARAMIS**

Taramis started under the name **Prowler** already in 1982 and made the clubs in Melbourne, Australia, unsafe with cover versions of Iron Maiden and other heroes. As so often, they decided to write their own songs, which ended up on the demo „**Blood & Honour**“ in 1984. Now they just had to drop the name reminding of Iron Maiden and called themselves **Taramis** from then on. In 1987 the debut „**Queen Of Thieves**“ was released on the small label **Metal For Melbourne** (actually a record store). The songs included have a magic all of their own and the material likes to be placed in the vicinity of epic metal. Emotionally charged acoustic parts alternate with powerful heavy metal and all this with a very virtuosic playing style. The budget for the recording was so low, however, that the LP is often referred to as a rough diamond. But just that also holds a very own charm, which albums by bands like **Manilla Road** or **Satan's Host** still prove today. After all, the album was licensed by **Metal Blade Records** (with different cover artwork) in 1988. **Roadrunner Records** followed suit for Europe in the same year. Nevertheless „**Queen Of Thieves**“ remained an insider tip for connoisseurs. After some line-up changes, **Taramis** emerged with a second album in 1991. This time the German company **Rising Sun** secured the rights (in Australia **Metal For Melbourne** was the label again) and released „**Stretch Of The Imagination**“ as CD and LP. The changed style towards progressive metal (with thrash influences) won new fans, but the label could not bring the Australians adequately forward. Also, in 1991 a different wind was blowing musically. **Taramis** disbanded, but reunited irregularly to play occasional gigs for their still large fanbase.

For the first time, the LP is now available as a remastered reissue (both albums were previously released by **Golden Core** as a double CD with bonus tracks). The cover is the Australian original of the first pressing.

Title: **To Jupiter and Back**
Artist: **KEBU**

Kebu's debut album "**To Jupiter and Back**" is celebrating its 10 year anniversary this year, and is finally getting its long awaited release on vinyl. 90 million views later **Kebu** has become a big YouTube phenomenon and a household name among synthesizer enthusiasts. The album was a tribute to Kebu's original influences for his music, namely Jean Michel Jarre, Vangelis and Mike Oldfield. The album contains eleven tracks, of which "Le Carnaval des Étoiles", "Pulsar" and the title track are among Kebu's most popular songs. It established his trademark sound, being produced using only analog synthesizers and mixed with an analog mixer. The **vinyl** edition comes on a 180 g vinyl in a gatefold sleeve, and contains a poster of the original cover art, painted by Kebu's wife Heidi Väisänen.
