Title: **Possessed In The Circle Pit**
Artist: **POSSUIDO PELO CAO**

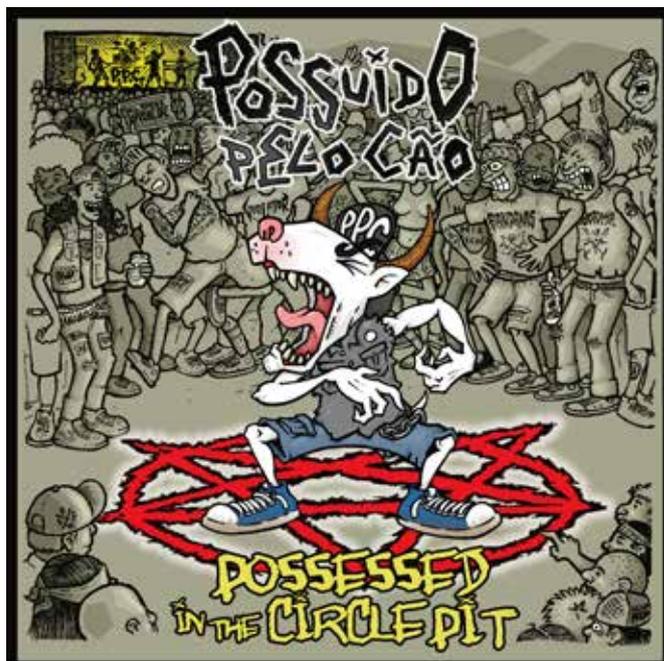

the debut album from the cult Brazilian thrash/HC band
-released in 2008, out of print since 2010
-for the first time with proper vinyl mastering
-gatefold LP with printed insert

Brazilian thrash/crossover band **Possuído Pelo Cão** is a cult band in its homeland, and not just because of some of its members, who are also known as **Violator**, **DxFxCx**, **Terror Revolucionário** and **Innocent Kids**. The first demo, "**Semen Churches**", publicly praised by Possessed singer **Jeff Becerra**, was released in 2006, and at the time was only released digitally and in a small CD edition. A reissue (CD only) on **Golden Core** took place in autumn 2024.

Political and socially-critical lyrics are typical of the genre, but it goes without saying that fun also plays an important role. This can be heard throughout the energetic debut album **Possessed In The Circle Pit**. The pleasure of playing and the energy are simply contagious, even on sound.

This **2008** debut album has not been available on vinyl since **2010**. The timing is perfect, as the band has been active again for a few months and is finally looking to establish itself in Europe. The reissue of the LP, for the first time mastered appropriately for vinyl and in gatefold, as well as the recent 2006 EP "**Semen Churches**", also released by Golden Core, help them to do so.

Title: **Threehoppers (Box Set)**

Artist: **THREEHOPPERS**

The insect world of **grasshoppers** and locusts has existed for over **50 million years**, and is as old as the Amazon rainforest. Now, for the first time, we can hear them, and their music is radiant. A professor of bioacoustics has recorded their vibrations on plants, and a musician has transformed their sounds into a unique album. **Paul Deshusses** and his team take you on a **wonderful journey** through the forests and jungles of **South America** to demonstrate how they communicate and feel.

Thanks to Professor Crocroft, who captured the vibrations with lasers and recorded their sounds, and the stunning photography of Andreas Kays, combined with the magnificent melodies of Romano Bianchi, you can admire the magical world of the Threehoppers, and Zyx Music takes you there !!!!
