By the end of the eighties, thrash metal had also established itself in Germany and was even playing a leading role worldwide. Already at this time it was no longer enough for some bands to simply play fast and aggressively. Thrash metal became more sophisticated and technical in many cases. In the USA, Watchtower took this to the extreme, followed by several bands in Germany on the Aaarrg Records label (Mekong Delta, Target). While other acts initially played straight and then flirted with progressive elements in the course of their career (Holy Moses, Deathrow, Destruction), Hamburg's MEGACE put together a sophisticated package of sophisticated thrash and prog as soon as the band was founded in 1988. With singer Melanie Bock, they also had a special ace up their sleeve, as she can do both: throaty thrash shouting and melodic vocals. This immediately set MEGACE apart from other bands and gave them a chance, which they seized. After a few demo tapes, the debut album 'Human Errors' was released, which was consistently praised in the press and still has fans all over the world today (reissue on CD and LP, Golden Core 2025). The second album 'Inner War' was released belatedly in 1999 on the small label Angular (Sylvan, Vanishing Point, Lana Lane). But just as popular as the two albums are the first three demo tapes, which were also in circulation as cassettes at the time: The Sign Of The Ape, This Is The News and Pseudo Identity. After the second album, the lesser-known tape 'After Death' was released, which can also be heard here for the first time. All the material has been restored and remastered in months of work and is in no way inferior to the sound of the two albums. The CD version also contains further unreleased recordings. Many photos and illustrations, as well as liner notes, round off a perfect product. Many metal fans have been waiting years for this...

Title: **Belleville**
 Artist: **ANDY GOLDNER**

- for the first time on CD, the cult album from 1981
- with members of Exmagma and Eulenspygel
- a musical mix that can ONLY be found on this album
- Remaster 2025, booklet with liner notes, photos and memorabilia

Andy Goldner (aka. Andy Göldner) is still an important part of the music scene in the Stuttgart area today. He started out as a member of the Stuttgart band The Five-Fold (1965-1969). Musically, they were characterised by beat and pop, as well as the music of Jimmy Hendrix. Andy Goldner was also a member of the bands Muli & The Misfits, Seelow and, of course, Exmagma. After a brief intermezzo with the band Yagua, he founded the first Andy Goldner Band in 1977, with which he played together with Kraan at the Mini-Woodstock in front of 8,000 people in the Odenwald. In the same year he played on Hellmut Hattler's LP 'Bassball' and a year later on the first solo album 'Alto' by Johannes "Alto" Pappert. In 1979 he released his first solo LP, which was recorded and produced by Conny Plank. In 1980 he worked on his second album 'Belleville' for the German label Peak (part of GAMA Musikverlag). In addition to Goldner (vocals, guitar), his band colleague Tommy Balluf (organ) from Exmagma can also be heard here. Bass and drums were provided by two musicians from the band Eulenspygel, Peter Weber (bass) and Peter Garattoni. The LP was mixed by Achim Bosch, who was responsible for many early German rock records. Stylistically, 'Belleville' is unique, both then and now. While Andy Goldner's past musical paths can be categorised as krautrock or prog, he mixes this basis (see also the line-up) with the then current new wave punk, some hard rock and in two cases even reggae. This stew never sounds contrived or cramped, but comes across as natural and gripping. This cult album is now available on CD for the first time, remastered of course, including liner notes by Andy Goldner himself. In the nineties, he worked as a producer for Helga Pictures, among others, and also focused on film music.
